Tossups

1. In William Orpen's painting titled for this object, the model Emily Scobel sits on a chair. Also known as *I think I am ready now*, a William Merritt Chase painting titled for one shows a female in a pink dress. One surrounded by Passion scenes is between the marrying individuals of Jan van Eyck's *Arnolfini Portrait*, and the one in *A Bar at the Folies-Bergère* enables (*) viewing of patrons and a dress's backside. M. C. Escher's 1935 print of his hand holding a ball is also called Self Portrait in a Spherical one. For 10 points—give these objects in which people see themselves.

answer: <u>mirror</u> [Escher's work is *Self-Portrait in Spherical Mirror*]

2. The Mössbauer effect is a recoil-free nuclear emission and absorption example of this phenomenon using gamma rays. To restore lost energy, oscillating Foucault [foo-KOH] pendulums may exploit a magnetic form of it. Paul Lauterbur invented a medical imaging device that uses it, the (*) MRI. Related to a Latin word for "echo", crystal has a frequency described by this term, and on *Mythbusters* Jaime Vendera exploited that to shatter a wine glass with his voice. For 10 points—give this term, one of whose opposites is dissonance.

answer: <u>resonance</u> (accept word forms including <u>resonant</u> frequency)

3. Michael Honey collected this person's communications into *All Labor Has Dignity*. In 1999 Loyd Jowers, the owner of Jim's Grill, lost a wrongful death suit pertaining to the day this person died. Stanford University discovered his theological dissertation contained plagiarized sections. In July 1962 he called for a (*) day of penance asking Albany Movement members to use nonviolent protest, and earlier his house was bombed during the Montgomery Bus Boycott. For 10 points—give this March on Washington leader honored on a January holiday.

answer: **MLK** or Martin Luther **King** Jr.

4. Louis Moreau Gottschalk composed *Bamboula* and *The Banana Tree* for this instrument and taught Teresa Carreño to play it. It was the Tchaikovsky contest category won by Dmitry Masleev, Barry Douglas, and Van Cliburn, and is used in the Arthur Rubinstein competition. Bartolomeo (*) Cristofori invented this device manufactured by Steinway & Sons. Most modern examples play notes between an A to a C seven octaves higher and have three pedals. For 10 points—name this instrument with 88 black and white keys.

answer: <u>piano</u> or <u>pianoforte</u>

5. Governor Mark Sanford's staff said he was enjoying this landmark when he was actually visiting a mistress. Conceived by Benton MacKaye, Randall Lee Smith committed two and attempted two more murders here. A Harlem Line railway stop connects it to Grand Central Station, and the High Huts of the White Mountains are available for those (*) trekking on it. Its endpoints are Springer Mountain in Georgia and Mount Katahdin in Maine. For 10 points—give this path that allows hikers to enjoy an eastern U.S. mountain range.

answer: <u>Appalachian</u> (National Scenic) <u>Trail</u> (prompt on "Appalachian Mountains" and similar)

with thanks to Bern McCauley and the Great Valley Quiz Team

6. One person who held this position in this country names a Renzo Piano-designed building with colored water pipes and air ducts. Another may have approved the 1985 bombing of Greenpeace's Rainbow Warrior. A third asked "How can you govern a country which has two hundred and forty-six varieties of (*) cheese?" Congress's cafeteria started serving "freedom fries" after the Iraq War was criticized by its then incumbent Jacques Chirac. For 10 points—give this position held by Charles de Gaulle and François Mitterrand.

answer: **president** of **France** (or **French Republic**) or **Président** de la **République française** [the performing arts center is named for Georges Pompidou]

7. In one of this writer's works, Jack Bevens lives in a building where Cecilia and Hetty use a potato and onion to make beef stew. He also described a tramp sent to Blackwell's Island for loitering. In his best known stories Bill and Sam must pay to get rid of a troublesome 10-year old, and (*) Jim and Della sell prized possessions to buy presents. "The Ransom of Red Chief" and "The Gift of the Magi" are by—for 10 points—what author who once joked the letter in his pen name stood for Olivier?

answer: O. <u>Henry</u> or William Sydney <u>Porter</u>
[the first two plots are "The Third Ingredient" and "The Cop and the Anthem"]

8. The title of a 2016 Haunted Garage album, *Lost Girl* linked this fictional figure to the Pied Piper. *Soul Eater* manga about him inspired a Port Richey, Florida arson. Morgan Geyser and Anissa Weier wanted to live in this individual's Nicolet National Forest mansion in Wisconsin and (*) stabbed a friend. In a 2018 film Wren and her friends summon this figure but go insane when they look at him. Eric Knudsen photoshopped this figure into images where he stalks children on a creepypasta forum. For 10 points—give this folklorish thin male figure.

answer: Slender Man

9. Organisms lacking the brevis radix protein have difficulty forming these cells described by an Ernst Münch hypothesis. Heinz Dietmar Behnke labeled s- and p-types of its sieve plastids, as they dealt with starch and proteins. Mountain pine beetles and aphids gain nutrition from this tissue. This term is from the Greek for (*) "bark", as it is found between trees' cambium and outer bark. Multidirectional movement in these living cells includes the flow of sap. For 10 points—give this tissue transporting food throughout plants, a counterpart of xylem.

answer: **phloem**

10. Operation Guard Shack was an FBI anti-corruption effort that in 2010 arrested some of this polity's police and prison employees. Due to 1999 local navy bombing practice, its municipality of Vieques [vee-A-kess] saw protests. Led by Governor Ricardo Rosselló, The PROMESA law established a board to oversee its billions of debt. Many (*) emigrated from it, and thousands were without power for months after Hurricane Maria devastated this island. For 10 points—give this U.S. commonwealth with capital San Juan, whose name is Spanish for "rich port".

answer: Puerto Rico

with thanks to Bern McCauley and the Great Valley Quiz Team

11. This rock is rounded in Bunter Pebble Beds, and the Gazzi-Dickinson method can quantify it on a QFL diagram. Arkose is a variety with at least one-quarter feldspar and Itacolumite is a yellow example. The University of Sydney's Quadrangle is composed of this substance also sculptured at Petra in Jordan. Storing (*) water between its grains, much of Wyoming and Wisconsin's aquifers have this sedimentary rock found in river beds with eroded stone particles. For 10 points—give this stone composed of a substance found at beaches and deserts.

answer: <u>sandstone</u> (prompt on "sand")

[similar to the U.S. Ivy League, Australia's oldest colleges are called the Sandstone Universities]

12. Susan Clarencius was a lady in waiting for this English monarch whose reign saw the founding of the Irish city now called Portlaoise. Henry Dudley's and Thomas Stafford's plots, as well as Wyatt's Rebellion, were against this ruler, and Privy Councillors supported Lady Jane Grey's claim over hers. This daughter of (*) Catherine of Aragon and Henry VIII ["the eighth"] followed the Catholic faith and burned bishop Hugh Latimer at the stake. For 10 points—give this ruler whose Protestant persecutions led to the nickname "bloody".

answer: Mary Tudor or Bloody Mary or Mary I of England

[note this is *not* Mary Queen of Scots; Portlaoise was originally Maryborough]

13. This one word ends the film adaptation title of John MacDonald's *The Executioners*. Isadora Wing's affairs at a psychoanalyst's conference appear in an Erica Jong title including it, and Raoul Duke destroys hotel rooms and hallucinates in a Hunter S. Thompson title starting with this word. Over a million copies of a September 2018 nonfiction work with this title were sold; in it (*) Gary Cohn and Rob Porter withhold documents from Donald Trump, as told to Bob Woodward. For 10 points—give this term for a feeling experienced by those with phobias.

answer: fear

[the works are Cape Fear, Fear of Flying, Fear and Loathing in Las Vegas, and Fear]

14. Massimo Livi Bacci wrote a "concise history" of this quantity that drives technological advancements in Ester Boserup's theory when it increases. The main focus of a 1968 Paul Ehrlich work titled for a "bomb", in the 14th century it decreased around twenty percent. In a 1798 essay, Thomas Robert (*) Malthus argued food supplies grow arithmetically while this grows exponentially. Some models says it will level off this century, but currently it increases 2.37 every second. For 10 points—give this quantity around 7.7 billion.

answer: global (or world) **population** or **human population** (accept A **concise history of world population** or The **Population Bomb**; do not accept more specific answers like "U.S. population")

15. In 1884 William Bubeck used this heraldic creature on fountains in Switzerland's third-most populous city after Zurich and Geneva. Pliny the Elder said they came from Cyrene and some thought men on horseback could die from poison spread up a stabbing weapon. Hildegard of Bingen claimed one of these "little kings" emerged from a toad egg. (*) Weasels' smell was fatal to them, an account possibly inspired by mongooses and snakes, and others said these died after looking in mirrors. For 10 points—name these serpents whose gaze is lethal.

answer: <u>basilisk</u> (accept <u>cockatrice</u>) [that Swiss city is Basel]

with thanks to Bern McCauley and the Great Valley Quiz Team

16. Civil engineer Reginald Thomson designed much of this city including its Denny Regrade. Norm Stamper's police chief resignation followed the street protests during the 1999 World Trade Organization meeting here. Though 2700 miles away, Erastus Brainerd publicized this city as a gateway to the Klondike gold rush. Microsoft leader Paul Allen founded the (*) Museum of Pop Culture here and it includes the Pike Place Market and Space Needle. The Mariners and Seahawks play home games in—for 10 points—what Washington city?

answer: <u>Seattle</u>, Washington

17. Isotope 62 of this element has the highest binding energy of known nuclides. Axel Fredrik Cronstedt isolated this element whose pure form results from Ludwig Mond's technique. Ten to twenty percent of people get contact dermatitis when touching this element removed from hypoallergenic jewelry. Kamacite minerals contain (*) iron and this metal left by meteorites. Atomic number 28, this mildly-magnetic silver-white metal is bonded to chromium in nichrome [NIH-chrome]. For 10 points—name this element still used in five-cent coins.

answer: <u>nickel</u>

18. This term is derived from a verb meaning "to attend" and an early use was in a 10th-century poem encouraging one to hold an umbrella. Jan Joosten and William Adams achieved this status after a trading mission stranded them in a foreign country. The head of a leader of these was hidden after a September 1877 defeat wiped out the (*) Satsuma Rebellion. The rōnin were ones without a master and these followers of the Bushidō code might restore disgraced honor through seppuku disembowelment. For 10 points—give the term for these Japanese warriors.

answer: <u>samurai</u> (accept <u>bushi</u> before "Bushidō")

19. Ernst Abbe articulated a condition named for this function that when satisfied allows lenses to produce sharp images. The 7th century Indian Bhaskara I ["the first"] included the number 40,500 in an approximation of this function which is multiplied by the imaginary "i" in De Moivre's formula. The length of a polygon's side over this function of the corresponding (*) angle is a constant in the law of this function whose reciprocal is the cosecant. Opposite over hypotenuse is the definition of—for 10 points—what trigonometric function which is first in the mnemonic "SOH-CAH-TOA"?

answer: <u>sine</u> (accept Abbe <u>sine</u> condition)

20. One character asks the consequence for dropping this person and the answer is "he'd punish us". Characters think he is shouting at his horse, but that is derided as wind in the reeds. He is thought to have a white beard, and allows a shepherd and goatherd to sleep in his hayloft. This character apparently does nothing, but will surely be coming (*) tomorrow. After the baggage-carrying Lucky enters, Pozzo is mistaken for this elusive character. Samuel Beckett created—for 10 points—what character that Vladimir and Estragon are waiting for?

answer: <u>Godot</u> (accept <u>Waiting for Godot</u>)

with thanks to Bern McCauley and the Great Valley Quiz Team

21. This act codified in the Fourth Lateran Council Canon 21 has roots at Skellig Michael, where participants had an anam cara who encouraged contrary action. Patrick Leinen's iPhone app facilitating this action has earned official blessing. This act is the subject of John Cornwell's *The Dark Box*, and Pius IX ["the ninth"] decreed an age of (*) seven appropriate for it. Individuals with mortal transgressions who have not yet done this are not supposed to take Communion. For 10 points—give this process in which Catholics admit sins.

answer: <u>Confession</u> or Sacrament of Penance and <u>Reconciliation</u> (prompt on "penance")

22. At this play's beginning, a sword, horse, and bedstead are shown as Christmas gifts. When its characters Kristine Linde and Doctor Rank meet, they discuss hard work. Towards the end of this play the protagonist exclaims she has been performing tricks. Its plot features an Italy trip financed by a loan with a forged signature. Nils (*) Krogstad uses that, attempting to prevent Torvald's firing of Nils by blackmailing Nora Helmer. Henrik Ibsen wrote—for 10 points—what play titled for a place where Raggedy Ann or Barbie might like to live?

answer: A **Doll's House** (or A **Doll House**) or Et **dukkehjem**
